ES-TE in times of CoViD-19

Dear and valued customers,

Current developments in Germany linked to the development of the so called CoViD-19 crisis have motioned ES-TE to take bold measures in order to protect and safeguard health of all ES-TE employees.

Part of our staff in design, planning, service, accounting and software programming have started working from home as of March 17th. In order to protect the workers in assembly, manufacturing, quality control and shipping, who often reach our company by public transportation, we have decided to shut down the whole operation effective April 4th. We will return to normal and full operation on April 20th.

We will neither be able to accept any incoming shipments nor ship any goods during that period. We will also delay fulfilment of orders that reach us through our web shop during that time frame until April 20th. Trainings and onsite visits have also been cancelled until further notice.

Service, logistics and sales will be available by e-mail through the addresses that have been used in the past.

We have taken measures to assure that all orders that have been booked so far will be shipped on time without any delay. All of our supply channels have been checked and until now we do not foresee any shortages in supply that may force us to slow down our production in the nearer future.

Shipments that have been scheduled for the time of factory closure will be shipped in the week before we close the factory.

We wish you and you families as well as your colleagues all the best besides health and strength in order to endure the challenges that lie ahead of us in the coming weeks.

ES-TE Folding Systems GmbH
